INSTAGRAM WRITEUP:

INSTAGRAM, online social media platform and social network service for photograph and video sharing. The App was launched in 2010 by cofounders Kevin Systrom and Mike Krieger, and it is now owned by Meta Platforms Inc., the parent company of Face Book. One of the biggest social media platforms in the world ,Instagram surpassed two billion monthly active users in 2022. The company's headquarters are in Menlo Park, California.

Instagram's service is relatively straightforward. It focuses on posts containing images and/or short-form videos. These posts are contained within a user's profile and may be displayed publicly within Instagram or privately to the user's followers. There are two main channels for posting: into the user's permanent feed or into their "Stories," a special section where content remains for 24 hours before disappearing (unless specifically archived). It is also possible to go "live," streaming video directly from a camera to the platform.

Users may connect with each other via private message (known as a direct message [DM]), where they can share permanent photos or videos or vanishing photos or videos (similar to Snapchat). Users are able to "follow" each other, with all of the accounts one is following being aggregated into a single feed. The platform also allows for browsing by topic or hashtag, and a user can view a random mix of popular posts.

Instagram includes the ability to take photographs or videos in-app and also to edit new or existing photos or videos with the use of text, gifs, icons, and filters that add various lighting

effects, distortions, or other features, including hats or cat ears. Images were originally required to be square, 640 by 640 pixels to fit the width of the iPhone. However, in 2015 size restrictions were expanded to 1080 pixels.
